Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.	
Special protective equipment and precautions for firefighters	Firefighters should wear full protective clothing including self contained breathing apparatus.	
Fire-fighting equipment/instructions	In the event of fire, cool tanks with water spray.	
Specific methods	Cool containers exposed to flames with water until well after the fire is out.	
General fire hazards	No unusual fire or explosion hazards noted.	
Hazardous combustion products	May include and are not limited to: Hydrogen chloride. Oxides of sodium.	
Explosion data Sensitivity to mechanical impact	Not available.	
Sensitivity to static discharge	Not available.	
	6. Accidental Release Measures	
Personal precautions, protective equipment and emergency procedures	Keep out of low areas. Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the SDS. Avoid contact with eyes.	
Methods and materials for containment and cleaning up	This product is miscible in water. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water. For waste disposal, see section 13 of the SDS. Before attempting clean up, refer to hazard data given above. Use broom or dry vacuum to collect material for proper disposal without raising dust. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system. Prevent entry into waterways, sewers, basements or confined areas.	
Environmental precautions	Do not contaminate water.	
	7. Handling and Storage	
Precautions for safe handling	Avoid breathing dusts from this material. Avoid contact with eyes. Use good industrial hygiene practices in handling this material.	
Conditions for safe storage, including any incompatibilities	Store in original tightly closed container. Keep containers tightly closed in a cool, well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS). Keep out of reach of children.	
	8. Exposure Controls/Personal Protection	
Occupational exposure limits	No exposure limits noted for ingredient(s).	
Biological limit values	No biological exposure limits noted for the ingredient(s).	
Exposure guidelines	This material does not have established exposure limits.	
Appropriate engineering controls	TWA PEL: No specific limits have been established for sodium chloride, potassium chloride or calcium chloride (soluble substances). As a guideline, OSHA (United States) has established the following limits which are generally recognized for inert or nuisance dust. Particulates Not Otherwise Regulated (PNOR): 5mg/cu.m. Respirable Dust 8-Hour TWA PEL, 15mg/cu.m. Total Dust 8-Hour TWA PEL.	
	TWA TLV: No specific limits have been established for sodium chloride, potassium chloride or calcium chloride (soluble substances). As a guideline, ACGIH (United States) has established the following limits which are generally recognized for inert or nuisance dust. Particulates (insolubles) Not Otherwise Classified (PNOC): 10mg/cu.m. Inhalable Particulate 8-Hours TWA TLV, 3mg/cu.m. Respirable Particulate TWA TLV.	
	Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. If user operations generate dust, fumes, or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.	

### Individual protection measures, such as personal protective equipment

Eye/face protection	Safety glasses
Skin protection	
Hand protection	Protective gloves. Confirm with a reputable supplier first.
Other	As required by employer code.
<b>Respiratory protection</b>	Where exposure guideline levels may be exceeded, use an approved NIOSH respirator.
